

VII International Forum

"Instrumentation Engineering, Electronics and Telecommunications - 2021" (IEET-2021)

Izhevsk, Russia, 24-26 November 2021

The IEET Forums are being held since 2015 annually. The Organization Committee from the Kalashnikov Izhevsk State Technical University invites scientists, postgraduates and specialists to present, discuss and publish their most valuable scientific achievements on the proposed and related topics. We believe in the importance of live communication, therefore we highly appreciate the possibility of your face-to-face or online participation.

Topics

Instrumentation Engineering

- Non-Destructive Testing
- Industrial Automation and Control
- Physical Methods for Instrumentation Engineering
- Space Instrumentation Engineering
- Control and Monitoring Systems
- Biomedical Instrumentation
- Nanomaterials and Nanotechnology
- Renewable Energy
- Embedded Systems
- Robotics

Electronics

- Micro Machines and Microelectronics
- Micro- / Nanoelectromechanical Systems
- Electrical and Electronics Engineering
- Design and Manufacture of Electronic Devices
- Analog and Digital Circuit Design
- Sensors and Actuators
- Analogue and Digital Signal Processing
- Radio Engineering
- Algorithms and Software

Telecommunications

- Communication Theory
- Transport Telecommunication Systems
- Modeling, Simulation and Measurements for Telecommunications
- Wireless Networking
- Mobile Communication Systems
- Network Services and Applications
- P2P Networks
- Mobile Ad-hoc Networks
- Internet of Things
- Telecommunications for Industry 4.0

Participation

Oral report with presentation

Online presentation (Zoom)

Publication

Peer-reviewed and accepted articles will be published in a volume of the **AIP Conference Proceedings**, which is indexing at Web of Science and Scopus databases, in 2022. For details you might follow to Forum website.

Fees

USD 130 per article if accepted
